Type 2 Diabetes Treatment Study

PROTOCOL ID: T2D-001 **VERSION:** 2.0 (Synthetic Amendment)

DOCUMENT STATUS: FICTIONAL TRAINING / SOFTWARE TEST ONLY — NOT FOR CLINICAL USE

AMENDMENT PURPOSE: Evaluate protocol-version comparison and coordinator review in Clinical Trial AI.

INCLUSION CRITERIA:

1. Participants must be between 18 and 70 years old. **(Amended from 18–65)**

2. Participants must have Type 2 Diabetes.

EXCLUSION CRITERIA:

1. Participants with severe kidney disease are excluded.

STUDY PROCEDURES:

1. Blood glucose testing.

2. Blood pressure measurement.

3. HbA1c blood test. **(New in Version 2.0)**

VISIT SCHEDULE:

Screening Visit: Day 0.

Follow-up Visit: Day 30.

Additional Follow-up Visit: Day 60. **(New in Version 2.0)**

SAFETY INFORMATION:

Participants will be monitored for adverse events.

AMENDMENT SUMMARY (FOR TRAINING):

Version 2.0 expands the upper age limit from 65 to 70, adds an HbA1c blood test, and adds a Day 60 follow-up visit. Other listed criteria and procedures remain unchanged from Version 1.0.

Important: This synthetic protocol is not a real clinical study. No individual eligibility or medical decisions should be made from this document.
